HOUSE OF ADDYA • ATELIER NEW DELHI

PRODUCTION READY

Developer Master Implementation Plan

End-to-End Action Checklist & Owner Self-Service Handover Protocol

FOUNDER & CLIENT	LEAD DEVELOPER	TARGET DOMAIN	RECURRING COST
Addya Dubey	Prateek Raj	`houseofaddya.com`	₹0 / month (Zero server bills)

1 Zero-Cost Infrastructure Stack

Fully autonomous e-commerce engine

COMPONENT	TECHNOLOGY	MONTHLY COST	FOUNDER AUTONOMY LEVEL
Storefront & CMS	Next.js 16 (App Router + Turbopack)	**₹0 / mo (Vercel Free)**	100% — Addya manages products via `/admin`
Design & Theme	Tailwind CSS v4 + Editorial Typography	**₹0**	Feminine Gen-Z luxury aesthetic (`#FFF5F7` to `#BE185D`)
State & Inventory	Reactive Store Context + LocalStorage	**₹0**	Instant live store reflection without page rebuilds
Database	Supabase PostgreSQL (`supabase/schema.sql`)	**₹0 (Free Tier 500MB)**	Cloud orders, customers, and inventory backup
Payment Gateway	Razorpay + Direct Zero-Fee UPI QR	**0% setup, 2% card fee**	UPI QR goes directly to Addya's bank (0% fee)
Courier & Shipping	Shiprocket Express (Delhivery/BlueDart)	**Pay per label (~₹45)**	AWB tracking numbers link to live `/track` timeline

2 Developer Checklist: What You Need To Do From Your Side

Action items before client handover

PHASE 1 Admin Passkey & Security Setup

⏱ 2 mins

- [ ] **Admin Security & Passkey Configured:** Passkey defaults securely to `5692` (or custom `NEXT_PUBLIC_ADMIN_PIN` in `.env.local`). Demo bypass button automatically hides when custom PIN is active.
- [ ] **Verify PIN Gate:** Open `http://localhost:3000/admin` in an incognito window and verify the passkey unlocks the dashboard cleanly.
- [ ] **Test Lock Mechanism:** Click the **Lock** icon in the header to confirm the session is destroyed from `sessionStorage`.

> 💡 **Pro Tip:** Addya can bookmark `https://houseofaddya.com/admin?pin=XXXX` on her iPhone Safari for instant 1-tap entry without typing every time!

PHASE 2 Cloud Database Setup (Supabase Free Tier)

⏱ 5 mins

- [ ] **Create Supabase Project:** Go to `supabase.com` → New Project → Name: `house-of-addya` → Region: **Mumbai (ap-south-1)**.
- [ ] **Execute SQL Schema:** Open SQL Editor in Supabase, copy the contents of `supabase/schema.sql`, and click **Run**. Creates tables: `products`, `site_settings`, `orders`, `coupons`, and `reviews`.
- [ ] **Configure API Keys in `.env.local`:** Copy Project URL and `anon` public key into `NEXT_PUBLIC_SUPABASE_URL` and `NEXT_PUBLIC_SUPABASE_ANON_KEY`.

PHASE 3 Payment Gateway Registration (Razorpay & Direct UPI)

⏱ 5 mins

- [ ] **Create Razorpay Account:** Register at `razorpay.com` using Addya's business email and bank details for automated daily settlement.
- [ ] **Generate API Keys:** Under **Settings → API Keys**, generate Key ID and Key Secret. Add `NEXT_PUBLIC_RAZORPAY_KEY_ID` to `.env.local`.
- [ ] **Official UPI & Settlement Bank Configured:** Merchant UPI VPA is active as `anmoldube93@okhdfcbank` with direct settlement to **Punjab National Bank** (A/C: `0781100100005018`, IFSC: `PUNB0078110`, Beneficiary: Anmol Dubey). Direct 0% commission!

PHASE 4 Courier Logistics Setup (Shiprocket Express)

5 mins

- [ ] **Create Shiprocket Account:** Register at `shiprocket.in` and enter Atelier pickup hub address in New Delhi.
- [ ] **Initial Wallet Recharge:** Add ₹500 to the shipping wallet for initial label printing (Delhivery, BlueDart, BlrExpress).
- [ ] **Verify Live Tracking:** In `/admin` under **Orders**, update an order status to "Shipped" and enter a tracking number. Visit `/track` to verify the status pills update properly.

PHASE 5 Custom Domain & Free Cloud Hosting (Vercel)

10 mins

- [ ] **Push Repository to GitHub:** Ensure latest changes are committed: `git add . && git commit -m "Production release" && git push`.
- [ ] **Deploy on Vercel:** Import the repo at `vercel.com` (Hobby Tier — $0/month). Add environment variables: `NEXT_PUBLIC_ADMIN_PIN`, `NEXT_PUBLIC_RAZORPAY_KEY_ID`. Hit **Deploy**.
- [ ] **Point Custom Domain:** Under Vercel **Project Settings → Domains**, add `houseofaddya.com`. In the domain registrar (GoDaddy, Namecheap, Hostinger):
  - Add **A Record**: `@` → `76.76.21.21`
  - Add **CNAME Record**: `www` → `cname.vercel-dns.com`
- [ ] **Verify Automatic SSL:** Confirm HTTPS certificate is generated and green padlock shows on `https://houseofaddya.com`.

PHASE 6 Store Settings & Business Information Review

3 mins

- [ ] **Update WhatsApp Number:** In `/admin` Store Settings, input Addya's official customer care WhatsApp number for the floating concierge widget.
- [ ] **Verify GSTIN & Business Address:** Check Atelier address and return logistics address.
- [ ] **Review Promo Coupons:** In `/admin` Coupons, ensure launch codes `ADDYA10` (10% off) and `FREESHIP` are active.

PHASE 7 Pre-Handover End-to-End QA Testing

5 mins

- [ ] **Mock Order Checkout:** Select an outfit piece → pick size & color → add to cart → proceed to checkout → submit simulated UPI order → verify confetti burst and order confirmation ID.
- [ ] **Mobile Responsiveness Check:** Open storefront and `/admin` on iPhone and Android browsers to confirm buttery-smooth touch interactions.
- [ ] **Self-Service Catalog Test:** In `/admin`, add a test piece, adjust its stock by +5, and delete it to verify the real-time reactivity.

3 Owner Self-Service Cheat-Sheet (Give to Addya)

Addya's daily operating handbook

GOAL / ACTION	WHAT ADDYA DOES IN /ADMIN	STOREFRONT RESULT
Add New Outfit	Taps **+ Add New Product** → snaps photo with phone camera → sets price ₹1,899 → sets sizes XS-XL stock → clicks **Save & Publish**	Instantly live on homepage, lookbooks, search, and catalog
Adjust Piece Stock	Taps **+1** or **−1** stepper on product card, or taps **(Adjust Sizes)** to change specific XS/S/M/L counts	Live inventory updates immediately; prevents overselling
Mark As Sold Out	Taps **Mark Sold Out** button on any piece	Garment displays chic dark "SOLD OUT" badge; checkout disabled
Remove / Delete Piece	Clicks **Trash Icon** → confirms deletion in popup modal	Immediately purged from the store and customer search
Fulfill Order	Opens **Orders** tab → pastes Shiprocket AWB tracking number → marks as "Shipped"	Customer tracks shipment in real-time on `/track`

Phase 8: Client 10-Minute Handover Call Agenda

Follow this exact meeting script when walking Addya through the platform on Google Meet or phone:

MINUTES 0–2
Storefront Wow
Showcase homepage video hero, ticker, pink lookbooks, size guide, and cart drawer.

MINUTES 2–6
Admin Autonomy
Demonstrate adding a dress from phone camera, adjusting size stock, and deleting an item.

MINUTES 6–8
Orders & Shipping
Show where customer orders appear and how entering an AWB powers the live tracking timeline.

MINUTES 8–10
Passkey Handover
Give Addya her custom 4-digit PIN, verify access on her phone, and hand over logins.
